#### Practical

- o donning and starting
- o standard tests
- o search techniques
- o air management
- o recommissioning

### Overview

Breathing Apparatus training is an essential component of many activities from firefighting, confined space entry, wearing of gas suits and inspections in chemical, dairy and gas plants to name a few.

No matter whether you are part of an emergency response team, checking a valve for leaks or undergoing refresher training we will have a package to suit you.

We ensure our courses comply with the latest legislation and AS/NZS Standards.

The latest recommendations in the Standards is that personnel need to be refreshed every 12 months

### Unit Standards

3272 - Wear and operate breathing apparatus in general emergencies

25044 - Wear and operate breathing apparatus in the workplace

*You may also wish to consider gas suit training*
