# Fire Extinguisher

## Fire Extinguisher Training

### Course Detail

Duration	2 - 4 hours.
Group size	8 - 12
Location	Your workplace or other suitable location

### Topics

#### Theory

- o triangle of fire
- o classes of fire
- o types of extinguishers
- o pre-planning
- o actions on discovering a fire

#### Practical

- o identifying fire type
- o assessing fire risk
- o choosing correct fire extinguisher
- o safe use of fire extinguishers
- o use of hose reels
- o use of fire blankets

### Overview

In many situations large fires start as small fires. If someone can safely extinguish the fire while it is small the risk to lives and organisations can be minimised.

Our courses involve realistic small fires. These are common situations and dealing with them gives the people on the course confidence on handling extinguishers and real feedback on how fires respond to their extinguishing technique.

Courses range from point-and-shoot practical only to assessment against unit standards.

The focus is primarily on extinguishers in your workplace but participants are given opportunities to see other extinguishers and extinguishing techniques in action.

### Unit Standards

3271 - suppress fire with hand extinguishers and hose reels

*In addition, you may wish to consider:*

4647 - explain principles of fire science
