- o legislation

Practical

- o identifying workplace procedures
- o identifying exits/assembly areas
- o identifying alarm panels
- o operation of evacuation board

Overview

When an emergency such as fire, earthquake or flooding occur in your workplace the people most likely to be relied on will be the Building and Floor Wardens.

The ability of these personnel to respond decisively and appropriately can make all the difference to how people react in an emergency.

Our course's primary objective is to ensure wardens are aware of their responsibilities and how to safely and effectively evacuate their designated areas.

We also cover issues which may arise, and how circumstances change, from a fire situation to an earthquake scenario.

We train in your workplace to your policies and procedures.

Unit Standards

18408 - Fire and emergency warden duties in the workplace

In addition you may wish to consider

3271 - suppress fire with hand extinguishers and hose reels
